QWIK LABS INSTRUCTIONS

Dear Students,

Please follow the instructions mentioned below to complete the QWIK LABS quests successfully.

I have created an account for each of you and have added your "radar.gsw.edu" email. You should receive an email asking for confirmation along with 200 credits added to your account. You will be using these credits to complete the quests successfully. After creating an account you are supposed to do the following:

- Choose any four quests (from any area of cloud that interests you and from many listed in the Qwik labs website) and complete them accordingly (based on the instructions mentioned in Qwik labs).
- After you complete the quests, you will be awarded with a badge by Qwiklabs.

(P.S: I was told that the emails are going to the "Junk" folder. Please do check that folder if you don't receive an email in your inbox).

Following is the rubric and the required submission(s) for grading:

- Please submit a one or a two page report on GaView dropbox (**need not be in IEEE 2 column format**) detailing the quests you completed along with the screenshots of the badges. For each badge that you earn you will receive 20 points. (Total 20*4 =80 points + 20 points for report = 100 points).

- You submission should be in the following format "**Firstname_Lastname_Qwiklabs_Report.pdf**". 10 points will be taken off if the submission is not in the above format.

- Late submissions will not be accepted.

- The due date is mentioned on GaView. Please check that carefully and submit accordingly.

- If you are new to the world of "Cloud Computing" or Qwiklabs, I would request you to first complete the "**A Tour of Qwiklabs and Google Cloud**" lab. This is available for free on Qwiklabs.

- Also, try to stick to four quests only as you will need the remaining credits to complete the project.

- If for some reason you exceed the 200 credits, you are responsible for purchasing the remaining credits.

- As always, if you have any doubts please don't hesitate to email me.
